KEUCO EDITION 11: Bathroom design at its finest

A wealth of variety creates opportunities for individual interpretation

EDITION 11 – the innovative furnishing concept from KEUCO, specially developed for upmarket interior design, offers individual solutions for creative and sophisticated bathroom planning. The emphasis is on interior design with an architectural focus. Thanks to the modular concept, EDITION 11 offers the greatest possible freedom when it comes to planning.

EDITION 11, designed by Tesseraux + Partner in Potsdam, encompasses all the elements required for bathroom design – from washbasins and furniture, mirror cabinets and light mirrors right through to fittings and accessories – in a way that perfectly coordinates design and function. The extensive Edition 11 range offers a huge number of combination and planning options, from small separate elements right through to large washbasin solutions that can fit in with the existing interior.

The exclusive washing unit comprising washbasin, washbasin base unit and fitting is at the heart of EDITION 11. The EDITION 11 range comprises both ceramic as well as Varicor washbasins in various sizes and models. The ceramic washbasins of EDITION 11 are available in three dimensions (700, 1050 and 1400 mm) and the customised Varicor washbasins are made in grid sizes up to 2800 mm. The storage surface blends seamlessly and elegantly into the basin. Whether you want a double washbasin or a single washbasin, EDITION 11 offers a wealth of options for individual bathroom design.

The broad range of furniture from the side unit to the tall unit together with the large selection of front surfaces finishes also offers ample opportunities for interior design: you can choose textured paints that give the surface a feel reminiscent of natural materials such as leather or textiles,

while elegant real wood veneers produce a sensual and natural atmosphere, and shiny glass fronts create an extravagant air.

A high-gloss varnished surface with piano lacquer quality emphasises its refined character. The high-gloss glass fronts in conjunction with the silk matt carcasses offer an attractive combination. Colour-coordinated glass storage areas on the side units and at the washbasin guarantee superior furniture design in the bathroom.

The restrained and linear design style of EDITION 11 furniture is characterised by a handle-free look. The drawers are of the push-to-open variety. Well-devised functionality right down to the last detail is evidence of the interior design of the furniture: sliding sorting units ensure the best possible orderliness and clarity. The vanity units glow can be gently illuminated with an optional LED interior light, automatically switching on and off when the unit is opened and shut.

It is with good reason that KEUCO's EDITION 11 has been awarded the 'iF Product Design Award 2012', as well as the 'Plus X Award 2011' for High Quality and Design. Furthermore, the EDITION 11 fittings have also won the 'Plus X Award' Best Product of the Year.
