

ABITARE IL TEMPO 2010
ABET LAMINATI and Simone Micheli
In collaboration with P.L. Abet Group

ABET LAMINATI - in collaboration with P.L. - technical sponsor at Abitare il Tempo for the project "OVERSEA BUILDING: a truly sustainable story in Chioggia by Simone Micheli for Ghirardon Group"
Abitare il Tempo Verona, 16 - 20 September 2010
Interior Architecture Pav. 8

Oversea Building is about a particular case of architectural reality, brought within Abitare il Tempo 2010 featuring significant fragments.

It is a new way to conceive the house through the construction of a building which is completely auto-sustainable, energy rating A. An architectural work able to create a perfect osmosis between the interior and the exterior: the interiors, rigorous, clean and full of emotion, complete the dynamic expressive lines. The building, with very minimalist features, characterised by fluid geometry and components full of energy, stretches out over 6 floors and over 2500 square metres. An eco-innovative, eco-functional residential complex linked to eco-design, Oversea Building represents a real window overlooking the sea. It's about a fragment of matter wanting to transform itself into a true icon, linked to the concept of eco-compatibility, able to become a symbol for the future of architecture.

ABET LAMINATI, in line with the entire planning philosophy, has provided 1300sqm Tefor® Bianco 3510, 1.5mm thick, glued on PL planks, size 19 x 120cm, 8mm thick, for the flooring of the exhibition area.

Tefor® is the first totally recycled and recyclable laminate. It was obtained from the collection and re-use of manufacturing wastes which have been ground up and mixed with recycled polypropylene.

In the words of architect Micheli "Oversea Building is a synthesis of materials which expresses, with a firm voice, that it is part of the "future, next, adventure" contemporaneity; it is an architecture which carries outside and inside itself multiple stories which allows it to belong to the new networks which will come!"

ABITARE IL TEMPO
Verona Fair Grounds
16-20 September 2010
Pavilion 8 – Intern Architecture
9.30 a.m.- 6.00 p.m
on sunday 9.00 a.m. - 6.30 p.m
