DIGITALLY PRINTED MEG IN RECANATI (ITALY)

In recent years, Abet Laminati produced many systems of signs created for different needs, and to obtain the best performance possible the company has chosen its digitally printed MEG. The many qualities of MEG allow to satisfy the double necessity to manufacture a winning and resistant product.

The system of signs in Recanati is a good example of a customized project which perfectly fits to the environment, guiding the visitors through the city.

Project and pictograms: Architect Paolo Basilici
